

LOG it EASY

<https://logiteasy.com>

**We are LOGitEASY. Our mission is
to improve the way geologists
log soil and create
boring logs & report figures.**

Time & Cost Savings

The LOGitEASY eForm has resulted in huge savings of time both in the field and for reducing transcriptional errors from entering data from paper logs. We are really glad to have this capability now.

Gilbane, Colton Ranson, Environmental Geologist II, CA

Ease of Use

I love your guys online drafting service. It is easy to use, fast, and the product is great quality. No hassles.

Nicolas Pushckor, Associated Environmental Group, LLC

Quality & Timeliness

My experience with the work that has been done on my projects has been great - easy to work with, quick on the turn-around, and a high-quality product.

Envirosolve Corporation, Project Manager, CA

Personalized Service

We submitted work requests for vapor probe logs, which were completed by LOGitEASY, and then their partner company ICD Services added the vapor probes to the existing site map and cross sections. All of our drafting needs for this phase of work were met from a single engagement.

Innovex Environmental Management, Inc., Project Manager, WA

Our Service Lines

01

Online Soil Logging Software:

DIY – Boring Logs Online
DIY – Geologic Cross Sections

02

GIS Mapping Software:

DIY – Topographic Maps
DIY – Site Plans
DIY – Groundwater Contour Maps
DIY – Analytical Box Figures

03

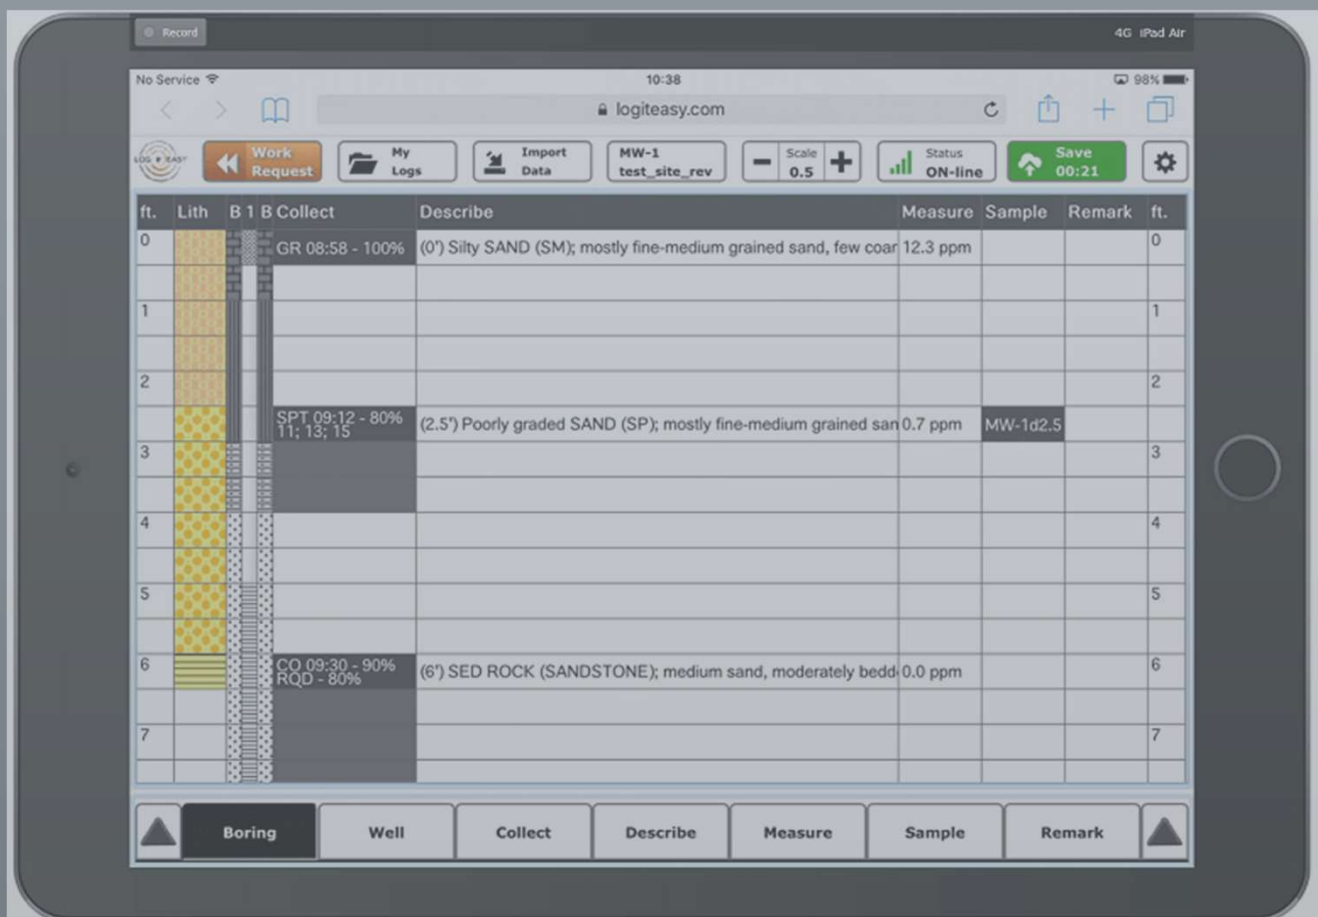

Fixed-Price Drafting Services:

Boring Logs from Field Notes
Environmental Figures
